The Mississippi Statistical Abstract, 1983, is the fifteenth annual edition which has been published by the Division of Business Research, Mississippi State University. It was prepared by Philip H. Turnquist, a graduate student pursuing the Doctor of Business Administration Degree, who served as Associate Editor; and Diane T. Dendy of the Division staff who served as Assistant Editor. Special acknowledgement is made to both of them for the excellent manner in which they performed their respective duties: analyzing materials from the previous edition, selecting new materials for the revision, and making significant improvements throughout.

Acknowledgement is made also to other Division Personnel who worked tirelessly to bring the fifteenth edition to fruition: Dale Adams, who assisted as manuscript typist in preparing camera-ready copy in addition to her duties as Publications Secretary; Janis Bryant, Assistant Editor of the Mississippi Business Review, who also found time to be of great benefit to the Abstract, Loura and Lianne Cartee, Sally Enos, and Jodi Webb.

The fifteenth edition contains the same sixteen sections found in previous editions, represents a compact aggregation of useful statistics about the State. It is used by researchers, administrators, planners, historians, educators, politicians, and a host of others who maintain an interest in Mississippi and its political subdivisions. Copies of earlier editions have been distributed in virtually every state in the Union and in a number of foreign countries.

Comments and suggestions for improvement of its contents and the manner in which they are presented are earnestly solicited. Just address your response to The Editor, Mississippi Statistical Abstract, Post Office Drawer 5288, Mississippi State, Mississippi, 39762-5288.

1.0: RECREATION, GEOGRAPHY AND CLIMATE

Information concerning park and recreation areas in Mississippi was obtained from the Mississippi Economic Development and the United States Statistical Abstract, a United States Bureau of the Census Publication. The County and City Data Book, another publication of the Bureau of the Census, provided data on land areas of Mississippi.

Monthly climatological data was provided by the United States Department of Commerce, National Oceanic and Atmospheric Administration.

The Mississippi Department of Wildlife Conservation provided previously unpublished data concerning hunting and fishing and the Mississippi Boat and Water Safety Commission provided data regarding certified boats by county.

The Division of Tourism of the Mississippi Department of Economic Development provided information relating to state parks, reservoirs, and national forest in Mississippi.

Additional information regarding the climate of this State may be obtained by writing to the National Climatic Center, Federal Building, Asheville, N.C. 28801, or to any Weather Service Office near you. Additional precipitation data are contained in the "Hourly Precipitation Data" for this State.

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this table are: Temperature in °F, precipitation and evaporation in inches. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

OBSERVATION TIME: The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground is at observation time for all except Weather Service Offices and FAA stations. For these stations snow on ground values are at 6:00a.m.,c.s.t.

SNOWFALL: Entries of snowfall in the table include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1941-1970.

DIVISIONS, as used in this table, became effective with data for January 1953.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

TABLE 1.3 (cont'd)

IN THE TABLE THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

+	And also on an earlier date or dates.
D	Water equivalent of snowfall wholly or partly estimated, using a ratio 1 inch water equivalent to every 10 inches of new snowfall.
M	One or more days of record missing; if average value is entered, less than 10 days record is missing. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
R	Amounts from recording gage.
T	Trace, an amount too small to measure.

Stations appearing in the table with no data were either missing or received too late to be included in this table.

Fifth	549,155	451,981	205,759	144,485

[1] Population counts for congressional districts are based on 1970 census complete-count data; housing unit counts are based on 1970 census sample data. These counts may not add to State totals because of post-1970 census corrections which were not assigned by congressionsl district and also because of sampling variability for housing unit counts.

3.0: HEALTH AND VITAL STATISTICS

The Mississippi State Board of Health has provided a wealth of data concerning births and deaths, marriages and divorces, and other matters relating to health.

Occurrence data were obtained from certificates filed in Mississippi at the place of the event. Residence data include transcripts of records of events that occurred in other states which involved Mississippi residents and exclude records filed in Mississippi which involved nonresidents.

The Mississippi State Board of Medical Licensure provided information concerning active physicians in Mississippi.

[1] Divorces per 1,000 married women 15 years of age and over.

NOTE: The divorce rates by race for the state and some of the counties where the race of the couple was unknown should be used with caution because the rate for the white and/or the nonwhite race will appear diminished in these instances.

4.0: EDUCATION

The bulk of the data regarding Mississippi public education has been taken from Statistical Reports, published by the Mississippi State Department of Education. Because private schools are playing an increasing role in the fabric of elementary and secondary education, available data regarding these indicators are also included.

Expenditures and receipts are published in the Annual Report of the State Superintendent of Public Education which also supplied information concerning teachers' salaries.

Comparative data for surrounding states have been taken from the Statistical Abstract of the United States, a Department of Commerce publication.

5.0: LABOR FORCE, EMPLOYMENT, AND EARNINGS

Labor force statistics for Mississippi are published monthly by the Mississippi Employment Security Commission in Mississippi Labor Market, Monthly Review of Current Labor. Annual data are found in the Annual Supplement to this publication which is published in March of each year.

Unemployed persons comprise all persons not working during the survey week who have made specific efforts to find a job within the past four weeks and who were available for work, and persons who were on layoff from a job or waiting to report to a wage or salary job within thirty days.

The bulk of employment data is found in Mississippi Covered Employment and Wages, published both quarterly and annually by the Mississippi Employment Security Commission. The employment figures cover all full-time and part-time employees who were employed for the pay period which included the twelfth of the month; consequently, the workers who were employed by more than one establishment during the reporting period are counted more than once, since each employing unit reports the number of persons on its payroll during the payroll period. Conversely, workers who were paid on a weekly or bi-weekly basis who did not work during the period including the twelfth of the month are not included in the employment figures for the month. Wage figures represent the total wages paid during the year.

The only workers without coverage after enactment of the 1978 amendments were agricultural workers whose employers had fewer than 10 workers and those who paid quarterly wages of less than $20,000, domestics of employers with quarterly payrolls of less than $1,000, persons performing religious duties for a church of other religious organization, unpaid family workers, and - in government - elected officials and certain other policy makers, members of the legislative and judiciary branches, members of the State and the Air National Guard, emergency employees, and employees of penal institutions. With the new 1978 coverage, approximately 85 percent of all Mississippi employment and 93 percent of all the state's non-agricultural employment was covered.

[1] Data covers 170,600 full and part-time production workers in manufacturing, 4,600 non-supervisory employees in electric services, and 11,200 in banking who worked during or received pay for the payroll period including the 12th of the month. The average earnings are "Gross", that is, they reflect not only changes in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

[1] See Table 5.14, Footnote 1, for explanation of Code.

[2] Where data for and individual establishment or reporting unit would not be divulged, monthly employment is given for industry divisions and for two-digit and three-digit groups. Criteria for non-disclosure of individual employer data are as follows: In cases where there are fewer than three establishments or reporting units in an industry division or group and in cases where there are three or more establishments or reporting units and one of these contains 80 per cent or more of the employment of the division or group, employment and wages data are combined and shown with data for other divisions or groups. Such data are included in county totals.

[3] The data for these industries are included in the NDC classification Code that immediately follows the code numbers or the table with the corresponding first two digits.

NONCLASSIFIABLE ESTABLISHMENTS

99	Nonclassifiable Establishments
999	Nonclassifiable Establishments

[2] Where data for an individual establishment or reporting unit would not be divulged, monthly employment and quarterly wages are given for industry divisions and for two-digit and three-digit groups. Criteria for non-disclosure of individual employer data are as follows: In cases where there are fewer than three establishments or reporting units in an industry division or group and in cases where there are three or more establishments or reporting units and one of these contains 80 percent or more of the employment of the division or group, employment and wages data are combined and shown with data for other divisions or groups. Such data are included in county totals.

[3] The data for these industries are included in the NDC classification code that immediately follows the code numbers in the table with the corresponding first two digits.

NDC - Non-Disclosure Criteria.

6.0: MANUFACTURING AND TRADE

Data on new and expended industries were supplied by the Mississippi Department of Economic Development. Business births and deaths for enterprises covered by the Mississippi Employment Security law were found in Mississippi's Business Population, Births, Deaths, and Changes in Ownership, a publication of the Mississippi Employment Security Commission.

The annual Service Bulletin of the Mississippi State Tax Commission provided valuable data concerning trade for industry groups as well as municipalities and counties in the state.

7.0: TRANSPORTATION

Motor vehicle registration data came from the publication of the Motor Vehicle Manufacturers Association of the United States, MVMA Motor Vehicle Facts and Figures. Highway user tax revenue information is also found in the publication.

The Mississippi Public Service Commission's Annual Report provided information on motor carriers and railroads. Railroad data were also obtained from the Yearbook of Railroad Facts, a publication of the Association of American Railroads.

Information on air transportation came from the Mississippi Aeronautic Commission publication, Mississippi Airport Directory, and the Federal Aviation Administration publications, Airport Activity Statistics of Certificated Route Air Carriers and FAA Statistical Handbook of Aviation.

[1] Vehicles of the civilian branches of the Federal Government are given in this table. Vehicles of the military services are not included.

[2] This information, compiled chiefly from reports of State Authorities is incomplete in many cases. Some States give State-owned vehicles only; others exclude from registration certain classes, such as fire apparatus, and police vehicles. For the States not reporting State, County, and Municipal vehicles separately from private and commercial vehicles and those reporting unsegregated total only, classification by vehicle type has been approximated on the basis of other available data.

[1] Short tons.

[2] Section included: from Mississippi River to the Junction of Old and Yazoo Rivers (9.3 Miles). Includes traffic of Vicksburg, Mississippi.

[3] Commodity Classification for Domestic Waterborne Commerce.

[4] Coastwise receipts and shipments - these terms apply to domestic traffic receiving a carriage over the ocean or the Gulf of Mexico. Internal receipts and shipments - these terms apply to traffic between ports of landings wherein the entire movement takes place on inland waterways. Also termed internal are inland movements that cross short stretches of open waters which link inland systems; marine products, sand and gravel taken directly from the beds of the oceans, the Gulf of Mexico and important arms thereof; and movemets between offshore installations and inland waterways. Local - movements of freight within the confines of a port whether the port has only one or several arms or channels, except car-ferry and general ferry, are termed "local".

Note: The commodity descriptions used in the statistical tables in this publication are abbreviated forms-to conserve printing space-of the following commodities.

Code No.	Item Name

8.0: COMMUNICATIONS AND PUBLIC UTILITIES

Much of the basic data concerning the communications industry in Mississippi can be found in directories which are prepared for each segment of the industry. For example, newspaper data were found in a directory entitled Mississippi News Media published by South Central Bell, and the National Zip Code and Post Office Directory yielded data for post offices. Gas and electric data pertaining to the production and consumption of these energy sources came from the Statistical Year Book of the Electric Utility Industry.

Other general statistics not appearing in this section may be found in the U.S. Statistical Abstract which is published annually by the U.S. Department of Commerce.

9.0: BANKING, FINANCE, AND INSURANCE

The Annual Report of the Department of Banking and Consumer Finance, State of Mississippi, provides additions to the time series data of deposits for both State and National Banks in Mississippi. Other detailed banking information is found in publications of the Federal Deposit Insurance Corporation such as Data Book, Summary of Deposits, and the FDIC Annual Report. Unpublished data from the Department of Banking and Consumer Finance completes the banking series in this volume of the Abstract.

Savings and loan information concerning the number of associations and their assets, liabilities and net worth comes from the Savings and Loan Fact Book.

The Life Insurance Fact Book and Insurance Facts are the sources for series and comparative data of insurance activities in Mississippi and selected states. The Insurance Department of the State of Mississippi supplied unpublished data which completed this category.

[1] Adjusted to December 31, 1982. In assumption cases, number of depositors refers to number of deposit accounts.

[2] Excludes $2,802 thousand of nonrecoverable insurance, expenses in cases that were resolved without payment of claims or a disbursement to facilitate assumption of deposits by another insured bank and other expenses of field liquidation employees not chargeable to liquidation activities.

[3] Includes estimated additional disbursements in active cases.

[4] Exludes excess collections turned over to banks as additional purchase price at termination of liquidation.

[5] These disbursements are not recoverable by the corporation: they consist almost wholly of field payoff expenses.

[6] Includes advances to protect assets and liquidation expenses of $347,602 thousand, all of which have been fully recovered by the corporation and $87,643 thousand of nonrecoverable expenses.

[1] Due to an error in compilation, the data for 1981 was incorrectly listed for 1980 in the 1982 edition of the MISSISSIPPI STATISTICAL ABSTRACT.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1946 through 1972. The size of the courts not reporting also influences the total cases.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years.

11.0: FOREST AND MINERAL PRODUCTS

Data concerning Mississippi Forest Resources are taken primarily from the Mississippi Forestry Commission's Annual Report and the U.S. Forest Service publication, Report of the Forest Service. Additional data were obtained from the Mississippi State Tax Commission's Annual Report of the Timber Severance Tax and the Statistical Abstract of the United States.

The principal source of mineral data for Mississippi is The Mineral Industry of Mississippi, published by the U.S. Department of the Interior, Bureau of the Mines. Petroleum data is found in Energy Data Reports, which is also published by the Bureau of Mines.

[1] Commercial timberland is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as commercial timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included.

[2] Includes Indian lands.

[3] Net volume of the saw log portion of live sawtimber trees in board feet, International 1/4-inch log rule.

[4] Net volume in cubic feet of live sawtimber and poletimber trees from stump to a minimum 4-inch top (of central stem) outside bark or to the point where the central stem breaks into limbs.

14.0: GOVERNMENT AND POLITICS

Information concerning election data was gathered from the Office of the Secretary of State of Mississippi. Comparative data can be located in the U. S. Statistical Abstract, a publication of the U. S. Department of Commerce, Bureau of the Census, and the World Almanac and Book of Facts, published by Newspaper Enterprise Association, Inc., of Cleveland, Ohio.

Veterans information comes from the Annual Report of the Veterans Affairs Board and Veterans Affairs Commission and also from unpublished data from these offices.

Other information is also obtained from the Mississippi Official and Statistical Register, 1980-1984.

15.0: CONSTRUCTION AND HOUSING

The U.S. Statistical Abstract was the principal source of construction data. Information concerning mortgage loans was obtained from unpublished data from the Federal Home Loan Bank of Dallas (formerly of Little Rock, Arkansas), the Statistical Yearbook, FHA Property Improvement and Mobile Home Activity Report, FHA Home Mortgage Insurance Operations, published by Housing and Urban Development, and Manufactured Home Financing published by the Manufactured Housing Institute also provided sources of information.

Because of the lack of municipalities which require building and construction permits, housing data are difficult to obtain for Mississippi. Other sources of potential data have also failed to yield adequate information.

16.0 AGRICULTURE

The United States Department of Agriculture is the leading source of agricultural statistics for the nation. Agricultural Statistics, its annual publication, is a comprehensive source of data on agricultural production, supplies, consumption, facilities, costs and returns.

The bulk of the Mississippi data for current state agricultural activities comes from a number of detailed publications pertaining to agricultural statistics that are published by the USDA. These include Economic Indicators of the Farm Sector, Field Crops: Production, Disposition and Value, Noncitrus Fruits and Nuts, and Potatoes and Sweet Potatoes.

Information on cattle is provided by the Wisconsin Agriculture Reporting Service, a cooperative function of the USDA, in its publication, Cattle Inventory.

[1] Except for mohair, the livestock commodities include only State estimates of income for which the Department estimates value of marketing for 1979-81. All other estimates, while included in commodity group totals, are not listed separately but are combined as appropriate in "other livestock" to prevent disclosure of confidential data.

[2] Commodities do not add to group total because broilers, turkeys, and minor commodities--turkey eggs, ducks, geese, guineas, and other poultry as estimated are included in "other livestock" below in order to avoid disclosure of confidential data. All minor commodities may not be estimated in all States.

[3] Cash receipts include value of home consumption.

[4] Commodities do not add to group total because broilers, turkeys, and minor commodities--turkey eggs, ducks, geese, guineas, and other poultry as estimated are included in "other livestock" below in order to avoid disclosure of confidential data. All minor commodities may not be estimated in all States.

[5] See footnotes 2 and 5.

[6] Except for rye, barley, corn, oats, sorghum grain, flaxseed, peanuts, soybeans, dry edible beans, dry field peas, potatoes, sweetpotatoes, citrus fruit, apples, apricots, avocados, cherries, dates, grapes, peaches, pears, plums and prunes, pecans, sugarcane syrup, alfalfa seed, fescue seed, crimson cloverseed, lespedeza, orchardgress, red cloverseed, sweet cloverseed, timothy, vetch, popcorn, strawberries, forest products, and greenhouse and nursery products, the commodities include only State estimates of income for which USDA estimates the value of production for 1981. Allowances are made in "other" categories for other States as all other estimates, while included in commodity group totals, are combined as appropriate in "Miscellaneous vegetables," "Other berries," Other fruits and nuts," or "Other field crops" items.

[7] Includes vegetables produced in the State but for which USDA does not estimate individual values of production.

[8] Includes fruits and nuts produced in the State but for which USDA does not estimate individual values of production.

[9] Includes seed and other field crops produced in the State but for which USDA does not estimate individual values of production.
